

Dear Neighbour,

Construction Works at King Richard Secondary School

I am writing to provide a further update on the King Richard School construction project.

During this time we will endeavour to make sure that our activities are carried out as considerately as possible to minimise disruption to our neighbours. Furthermore, we will be distributing regular newsletters to keep you up to date on the project progression.

Progress

The structural steel frame installation is now complete and all of the pre-cast floors and staircases have been installed. Your continued patience during these operations in the lead up to Christmas was greatly appreciated. As can be seen from the adjacent photograph the roof sheets are now installed on the Sports Hall. Our façade has commenced and you will have noticed the East side of the building now taking shape, including windows being installed. Over the next few weeks you will see the brickwork external walls being constructed. We

have two large concrete pours remaining – planned for 31st January and 22nd February.

As mentioned previously we are working with The Shaw Trust to provide employment opportunities locally through the construction works. If you would like any further information on this please contact me on the mobile number below.

Out of hours security remains in place so that we monitor the site outside of normal working hours.

Our regular meetings with the School continue and our assembly presentations are continuing where we provide information relating to the wider construction industry.

If we can help you with anything please contact me via my mobile phone on 07970 103892. Alternatively if you would like to talk to one of the Construction team directly, please contact our gateman at the main entrance and he will advise accordingly

A comments box is located near the entrance gate on Allaway Avenue for you to use at any time.

Should you need to contact us out of hours please call 0208 308 5051 and quote reference S6774.

Yours faithfully,
For and on behalf of Kier Construction

Andy Wright
Project Manager
